1. Introduction & System Overview

1.1 What the system does

The General Industries (GI) Hub is a multi-site warehouse inventory, procurement and asset-management system. It tracks every material movement - issues, receipts, returns and corrections - through a two-stage approval process, and gives you live stock figures, oldest-stock-first discipline on anything with an expiry date, stock valuation, serialised tool and equipment tracking, and a complete audit trail across every site you manage.

It runs in a web browser on a phone, a tablet or a desktop, and is also available as an installable app for Windows, macOS and Android.

1.2 Core principles

Principle	What it means
Stock is calculated, never stored	Stock on hand is always received, minus consumed, minus returned, recalculated from the movement history every time it is shown. No running total is kept anywhere, so no
Two-stage approval	Store Keepers stage entries step-HOD ready and commits at End-of-Day. Nothing touches the permanent ledger without HOD approval.
Site isolation	HODs and Supervisors see only their own site's stock. Only Admin sees all sites. Cross-site moves require formal
Audit-first	Every step approval action is recorded with the user's name, the exact time and what changed. Even a deletion leaves a trace.
Nothing to maintain	Upgrades apply themselves when the system starts. Nobody has to run a database update by hand.
Procurement chain	One continuous workflow from a site's request through to material on the shelf. Logistics owns purchase orders; Warehouse owns physical receiving and delivery notes; the Site HOD approves what is being sent; the Store Keeper
RL/BL strict separation	Rubber Lining and Brick Lining items NEVER share a PO line group, a DN, or a warehouse aggregation. The system rejects mixed-family DNs by design and tags each line with its family on insert.

Warehouse-blind pricing	Warehouse users can see materials and quantities but NEVER see Unit_Price, Total_Price, or any monetary header field on a PO. Three independent enforcement layers guarantee this.
-------------------------	--

1.3 The transaction lifecycle (the heart of the system)

Every stock movement travels the same four steps. Nothing reaches the permanent record until a Head of Department has approved it.

Step	Who does it	What happens	Where it sits afterwards
1	Store Keeper	Enters the issue, receipt or return on the Entry Log	Staged, awaiting approval
2	Head of Department	Reviews it at End-of-Day and may edit the quantity, approve, or reject with a reason	Still staged until they decide
3	System	Commits the approved entry to the permanent stock	Permanent - stock figures move now
4	System	Sends Sends the WhatsApp and in-app notifications, and writes the audit entry	Permanent audit history

Receipts, issues, returns and stock adjustments all follow this same shape. A rejected entry never reaches step 3, so it never affects a stock figure - but the rejection itself is still recorded, together with the reason.

1.3a The procurement chain

Buying material is a relay. Each role does one thing and hands over to the next, and every handover appears in the receiving role's own queue.

Step	Role	Action	Lands in
1	Site HOD	Submits a Purchase Request	Logistics - Incoming PRs
2	Logistics	Issues the Purchase Order	Site HOD is notified; Admin sees it for oversight
3	Logistics	Assigns the order (or individual lines) to a warehouse	Warehouse - Incoming Assignments
4	Warehouse	Acknowledges, then records the physical arrival from	Warehouse - Receiving
5	Warehouse	Prepares the Delivery Note	Logistics - DN approval queue
6	Logistics	Approves the delivery date	Site HOD - DN Approvals

Step	Role	Action	Lands in
7	Site HOD	Approves the contents	Store Keeper - Incoming DNs
8	Store Keeper	Confirms physical arrival on	Permanent stock record; the

Three side-paths exist for when things do not go to plan: ^{site} delivery closes

- Vendor returns - any role can raise one. The order line reopens so the material can be re-delivered.
- Reschedules - Warehouse or Site HOD request a new date; Logistics decides.
- Force-closure - Logistics only, for an order that will never complete. Both Admin and the Site HOD are notified automatically.

A Delivery Note may never mix Rubber Lining and Brick Lining material. The system refuses to create one, rather than warning about it.

1.4 Currency, dates, units

- Currency: Saudi Riyal (SAR) throughout.
- Dates: shown as DD/MM/YYYY or DD MMM YYYY.
- Time zone: the site's local time. Audit entries record the time to the second.
- Units of measure: each item carries its own unit - pieces, boxes, rolls, cans, metres, kilograms. There is no automatic conversion: an item is issued in the same unit it was received in. If a material arrives in boxes and is used in pieces, record the conversion in the item's description and keep one unit for both directions.

3. Login, Sidebar & Common Elements

3.1 Login screen

Elements:

- Username text box - your assigned username (case-sensitive).
- Password text box - masked input. Min 8 characters policy enforced on creation.
- Sign In button - checks your credentials and takes you straight to the first page your role can open.
- "Don't have an account? Request access" link - opens a self-service registration form.

Registration form elements:

- Username - must be unique
- Password / Confirm Password
- Role requested - selectbox: Store Keeper / Supervisor / HOD (Admin role cannot be self-requested)
- Site_ID - which site to associate the account with
- Phone Number - used for WhatsApp alerts (format: +966 5X XXX XXXX)
- Submit Request button - creates a pending_users row + audit log + WhatsApp alert to all admins

Admin must approve via Admin Portal -> Users tab before the user can log in.

3.2 Sidebar (visible after login)

Every page shares this sidebar. Reading top to bottom:

Element	Purpose	Notes
GI Hub bolt icon + version	Branding	Shows v3.0.0
Role card	Your username + role badge	Color-coded: grey=Store Keeper, emerald=Warehouse, blue=Supervisor, indigo=HOD, sky=Logistics, gold=Admin
Notifications bell (NEW v3.0)	Unread count + inbox dialog	Red badge if N>0, primary button changes to "Open inbox (N unread)". Modal shows recent procurement events with mark-read controls. See §3.6
"Navigate to:" radio	Page picker	Only shows pages allowed by your role
INVENTORY ALERTS section	Compact stock-alert badge	Visible to Supervisor/HOD/Admin only. Shows count of items below
Bug/Feature reporting	Opens a dialog	See §3.4
Theme toggle	Dark / Light mode switch	Persists per-session

Element	Purpose	Notes
Sign Out button	Ends the session	Audit-logs the LOGOUT event

3.3 Brand header (top of every page)

Variant	Used by	Visual
Standard header	Live Dashboard, Entry Log	Gold subtitle accent + current date
HOD header	HOD Portal	Purple subtitle accent + current date
Admin header	Admin Portal	Gold accent + green/amber pulse chip ("All systems operational" / "Degraded") + current date

3.4 Bug / Feature reporting dialog

Available to every user from the sidebar:

- Type selectbox - Bug Report / Feature Request
- Page dropdown - which page the issue/idea relates to (Live Dashboard, Entry Log, HOD Portal, Admin Portal, Reports, Other)
- Description textarea - up to 200 characters
- Submit button - writes to bug_reports table with user, timestamp, type, page, description. Visible to Admin in the Admin Portal Reports & Bugs tab for triage.

3.6 Notifications bell (NEW in v3.0)

Sits between the role card and the navigation radio. Every signed-in user sees their own personalised inbox of procurement-chain events.

Sidebar - Notifications bell with unread badge + inbox modal

Connectivity - offline indicator pill appears top-left when the browser loses network (Phase 7E)

The button:

- No unread: "Open inbox" (secondary button, no badge)
- 1+ unread: "Open inbox (N unread)" (primary button, red pill badge with the count, capped at "99+")

The inbox dialog (click the button):

- Only unread toggle - on by default. Flip off to see your full history.
- Per-notification card - colour-coded left border by severity:
 - Critical (red) - force-closures, T-0 delivery reminders
 - Warning (amber) - T-1/T-2 reminders, reschedule requests
 - Success (green) - DN approved / received successfully
 - Info (blue) - PR submitted, PO issued, assignments
- Per-row Mark read - flips just that notification
- Bulk [OK] Mark all as read - flips every visible row (respecting the role + site + warehouse scope)

you'd see normally)

What gets sent here:

Event you'll see	Triggered by
New PR from a site (Logistics only)	Site HOD pressing " Submit PR(s) to Logistics"
PO issued (Site HOD)	Logistics creating a PO against your site's PR
PO assigned to warehouse (Warehouse only)	Logistics routing a PO to your WH
DN awaiting your approval (HOD)	Logistics approving a DN delivery date
Incoming DN ready to receive (SK)	HOD approving DN content
Reschedule requested (Logistics)	Warehouse or HOD asking to push a date
Reschedule decided (requester)	Logistics approve/reject
Force-closure (Admin + originating HOD)	Logistics force-closing a PR/PO/line
Vendor return raised (Logistics)	Any role raising a return
Delivery reminder T-2 / T-1 / T-0	The daily sweep job (see §9)

The bell is tolerant - if the notification lookup fails, the badge silently shows 0 instead of breaking the sidebar. In-app notifications ALWAYS fire; the WhatsApp side is gated by the per-event WhatsApp toggles in the system settings (see §9).

3.5 Overdue Returnable banner (Store Keepers only)

When a Store Keeper logs in and there are overdue returnable items at their site, a red banner appears at the top of any page they navigate to:

> [!] OVERDUE ITEMS - Action Required: N borrowed item(s) past expected return: <item names>. Go to the Returnable Items tab to follow up.

5. Supervisor Manual

The Supervisor monitors a single site's stock, generates reports, and provides oversight. They cannot approve transactions (that's HOD).

Supervisor Portal - New Material Request form for workers

5.1 Pages visible

- Live Dashboard
- Supervisor Portal - Request Material for workers
- Entry Log (same interface as Store Keeper - see §4)

Supervisor Portal - My Requests history with cancel option

Supervisor Portal - Intent vs Actual variance report

5.2 Live Dashboard

The Live Dashboard is the at-a-glance view of every catalogue item with current stock, value, and status.

5.2.1 Brand header

Reads "Live Warehouse Stock Dashboard" - gold subtitle + today's date.

5.2.2 Hero metric strip (4 cards)

Card	Source	Tone logic
Catalogue items	Count of rows in inventory	Neutral

Total stock value	Sum of Current_Stock x Unit_Cost, all sites - formatted as SAR 1,234 / SAR	Neutral. Delta: "standard cost - all sites" or "set Unit_Cost in Admin -> DB
Below minimum	Count	Green=0, Amber<10, Red>=10. Delta:
Expiring / expired	Count	Green=0, Amber<10, Red>=10. Delta:

"shelf-life clear" or "review HOD

5.2.3 Ask in plain English (AI search) - expander (when the local AI assistant is switched on)

Available when the local AI service is installed and running on the server:

Element	Purpose
Your question text input	Ask in ordinary words, e.g., "items below minimum at site B"
Search button	The local AI turns your question into a database lookup and
Clear button	Resets the panel
Result table	Returned rows
Show the lookup the AI built	Reveals the read-only query the assistant produced, so you can check it before trusting the answer. It can only read -

If the local AI service is not running, an amber card explains how an Admin starts it. it is never allowed to change anything.

5.2.4 Burn alert banner

Appears at the top of the table area when there are items burning to zero within the configured window (default 7 days). Color-coded amber/red.

5.2.5 Main inventory grid

Column	Source	Notes
SAP_Code	inventory.SAP_Code	Primary key
Equipment_Description	inventory.Equipment_Description	Material name
UOM	inventory.UOM	Unit of measure
Total_Returned	Computed	Sum from returns table
Current_Stock	Computed identity math	Received - Consumed - Returned
Minimum_Qty	inventory.Minimum_Qty	Reorder threshold
Unit_Cost	inventory.Unit_Cost	Set via Admin -> DB Editor
Stock_Value	Computed	Current_Stock x Unit_Cost, rounded 2
Status	Computed badge	OK / Low / Below Min / Empty, shown as a colour-coded pill

You can sort by any column - sorting by Stock_Value shows your biggest SAR exposure first.

5.2.6 Expanders below the grid

Expander	Content
Stock vs Minimum Threshold	Horizontal bar chart, sorted by criticality. Each bar = item; gold line markers = minimum threshold. Color: red=empty, amber=below min, orange=close, green=ok. Capped at 20 items.
Burn Rate Forecast (30-Day)	Plotly chart with daily-burn-rate bars + vertical line at the 30-day alert threshold. Colors: red <10 days, amber <30, green >30.
Top Consumed Items	Bar chart of top 10 items by 30-day consumption, blue->gold gradient.

5.3 Reports

Supervisor sees the full Reports module but with site scope locked to their site (cannot pick "All Sites"). See §8 for the full Reports reference.

5.4 Supervisor - Use Cases

Use Case 1: Daily morning check

1. Log in -> Live Dashboard
2. Read the 4 hero cards - note any below-minimum or expiring items
3. Sort grid by Stock_Value descending -> check no over-stocked items
4. Sort by Status -> spot Empty / Below Min items
5. Open Burn Rate Forecast expander -> check the next 30 days

Use Case 2: Generate end-of-month report for management

1. Reports -> Generate Report
2. Pick Monthly Summary
3. From date: 1st of month; To: today
4. Site: locked to your site
5. Format: PDF
6. Click > Generate Report
7. Review the preview (includes SAR-value columns: Issued_Value_SAR, Received_Value_SAR, Closing_Value_SAR)
8. Click v Download PDF

Use Case 3: Investigate why an item ran out

1. Live Dashboard -> search the item (or click its row)
2. Open Burn Rate expander - see the daily rate trend
3. Reports -> Burn Rate Analysis -> date range last 30 days -> generate

4.

Filter the result table for the SAP code -> see daily breakdown

5. Reports -> Daily Consumption -> narrow down which Work_Type drove the spike

5.5 Supervisor - FAQ

Q: I can only see my own site. Why can't I see other sites' stock? A: By design - site isolation. Only Admin sees all sites. If you need to know another site's stock for a transfer, ask your HOD to file a Cross-Site Request.

Q: Total stock value shows SAR 0. What's wrong? A: Items have no Unit_Cost set. Ask Admin to enter costs in Admin -> Master DB Editor -> inventory table.

Q: AI search says "Ollama not running." A: Local AI is optional. An Admin has to install the local AI service and download the language model it uses. Without it, the system still works - you just type into the standard grid filters.

Q: The Stock_Value column is empty for some items. A: Those items have Unit_Cost = 0. The valuation is correct - they're tracked in qty but not in money.

Q: I can't approve any transactions. A: Correct. Supervisors monitor; HODs approve. Talk to your HOD.

Q: Can I export the Live Dashboard grid? A: Yes - every table has a download button for CSV or Excel. For a formal, branded report use Reports and generate one.

11. Status Codes, Reason Codes & Glossary

11.1 Common status pills

Status	Color	Meaning
pending	grey	Awaiting decision
flagged	amber	Has a concern (e.g., zero stock at
approved	green	Approved, ready for commit
rejected	red	Soft-rejected (row preserved for
committed	gold	Posted to permanent ledger
draft	grey	User can still edit
submitted	blue	Sent forward; awaiting next stage
in_progress	amber	Active (e.g., PR with supplier)
received	green	Fully delivered
open	blue	Active, has pending balance
closed	green	Fully fulfilled
OK / Low / Below Min / Empty	green/amber/orange/red	Stock vs minimum status
Expired / Critical / Warning	red/red/amber	Expiry buckets
sent	green	WhatsApp delivered

11.2 Adjustment reason codes

Code	Label	When to use
cycle_count	Cycle count correction	Routine periodic count
damaged	Damaged / unusable	Physical damage
expired_disposal	Expired - disposed	Expired and physically discarded
miscount_in	Miscount - found extra	Found more than system shows
miscount_out	Miscount - short	Found less than system shows
lost	Lost / unaccounted	Genuinely missing
theft	Suspected theft	Deliberate removal
return_to_supplier	<- Returned to supplier	Quality issue, sent back
other	Other (see notes)	Anything else (must explain in notes)

11.3 PR workflow states

- draft - manual creation, not yet sent
- submitted - sent to procurement
- approved - procurement greenlit
- in_progress - supplier engaged
- received - fully received

11.4 Lot statuses

- open - has remaining quantity, available for FEFO
- exhausted - fully consumed (auto)
- expired - past expiry date (manual or background)
- disposed - physically removed (manual)
- quarantine - held pending inspection (manual)

11.4a DN states (NEW v3.0)

draft -> pending_logistics -> logistics_approved -> pending_hod -> hod_approved -> pending_sk -> received With rejected as terminal from any pending state.

11.4b PO + PO line states (NEW v3.0)

PO header: open -> partially_delivered -> delivered -> closed / force_closed / cancelled PO item line: open -> partially_delivered -> delivered -> returned / closed / force_closed

11.4c Force-closure target types (NEW v3.0)

Code	Label
pr	Whole PR closed
po	Whole PO closed
po_item	Single line on a PO closed

11.4d Reschedule + vendor return states (NEW v3.0)

Reschedule: pending -> approved / rejected Vendor return: open -> vendor_acknowledged / resupplied / cancelled

11.4e RL/BL family tags (NEW v3.0)

Tag	Meaning	Detection rule
RL	Rubber Lining	The Material Code or Description contains "RL-", "RUBBER LINING" or "RUBBER-LINING"
BL	Brick Lining	It contains "BL-", "BRICK LINING", "BRICK-LINING" or "BRICK MATERIAL"
(none)	Neither family	The default when nothing above matches

The system works this out for you. An item is never tagged as both - if the wording matches both

families, RL wins.

11.4f Notification severity (NEW v3.0)

Severity	Visual	When used
info (blue)	Info pings - PR submitted, PO issued, assignments	
warning (amber)	T-2/T-1 reminders, reschedule requests, rejections	
success (green)	DN approved successfully, delivery completed	
critical (red)	T-0 reminder, force-closures, urgent escalation	

11.4g Logistics-status on PR rows (NEW v3.0)

Code	Meaning
site_draft	HOD has the PR but hasn't submitted to Logistics yet
submitted	Sitting in Logistics queue waiting for PO issuance
in_po	A PO has been issued against this PR line
closed	PR fulfilled normally
force_closed	Logistics force-closed the PR with a reason

11.5 Glossary

Term	Meaning
FEFO	First-Expiry-First-Out - issue oldest-expiring lot first
EOD	End-of-Day commit (HOD action that finalizes the day's transactions)
PR	Purchase Request
DN	Delivery Note (logistics document)
OCR	Optical Character Recognition - used for bulk-staging from images
PWA	Progressive Web App - the offline mobile companion
RBAC	Role-Based Access Control
WAL	A database setting that lets many people read while one person writes. Nothing to configure - it is on
Standard cost	Per-item Unit_Cost on inventory master (vs weighted-average cost which would require receipts-history)
Identity math	Stock derived from movements, never stored as a counter

12. FAQ - Master Index by Role

12.1 General (any role)

Q: I forgot my password. A: Contact your Admin. Admin -> Access Control -> Force Password Reset.

Q: I get "Permission denied" when clicking a page. A: Your role doesn't have access. See §2.2 for the access matrix.

Q: I want to suggest a feature or report a bug. A: Any page -> sidebar -> Bug/Feature reporting dialog. Admin reviews in Admin Portal -> Reports & Bugs.

Q: The page is blank or broken. A: Hard-refresh (Cmd+Shift+R / Ctrl+F5). If it persists, check with Admin - they can see audit logs to diagnose.

12.2 Store Keeper - see §4.8

12.3 Supervisor - see §5.5

12.4 HOD - see §6.14

12.5 Admin - see §7.13
